DETAILED ACTION

THIS OFFICE ACTION IS IN RESPONSE TO APPLICANT'S AMENDMENT FILED 12/16/2009.

Status of Claims

- Claims 8, 10-11, 14, and 16-17 are canceled.
- Claim 23 is new.
- Claims 1, 5-7, 13, and 18 were amended.
- Claims 1-7, 9, 12-13, 15, and 18-23 are pending.

Allowable Subject Matter

[2] Claims 1-7, 9, 12-13, 15, and 18-23 are allowed.

Reasons for Allowance

[3] The following is an examiner's statement of reasons for allowance. This application has been reviewed by the examiner and meets all formal and substantive (i.e., statutory) requirements and the language of the claims is enabled by, and finds adequate descriptive supported in the application disclosure as originally filed.

The primary reason for the allowance of the claims is the presence of limitations in the independent claims, which are not found in the prior art references. The examiner believes that the record of the prosecution as a whole makes clear his reasons for allowing a claim or claims. However, the examiner would like to point out one or more specific reasons and/or limitations that the prior art fails to disclose and/or make obvious. With regard to independent claim 1, the prior art, either alone or in combination with corresponding limitations as stated above, fails to teach or disclose of the claimed elongate body, elongate members, said elongate members being removably joined together, and a length of the elongate body being adjustable by an addition of another elongate member being joined to a terminal one of the joined elongate members; an

Art Unit: 3677

object slidably mounted on the elongate body; a biasing member biasing the object towards the end of the body, wherein one end of the biasing member abuts the object. Claims 2-7, 9, and 12-13, 18-19 are dependent upon claim 1.

With regard to independent claim 15, the prior art, either alone or in combination with corresponding limitations as stated above, fails to teach or disclose of that similar to independent claim 1, as well as that an overall length of the elongate body is adjustable by an addition of a further one of the elongate members to the joined together members, and a bearing surface located at a distalmost end of a terminal one of the joined elongate members. With regard to independent claim 20, the prior art, either alone or in combination with corresponding limitations as stated above, fails to teach or disclose of that similar to independent claim 1, as well as the elongate body composed of three portions, as well as a compression member. Claims 21-22 are dependent upon claim 20. Lastly, with regard to independent claim 23, the prior art, either alone or in combination with corresponding limitations as stated above, fails to teach or disclose of that similar to independent claim 1, as well as that an component that is slidably mounted on the elongate body between the object and the tree so that the tree at least partially contacts the component.

Any comments considered necessary by Applicant must be submitted no later than the payment of the issue fee, and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Art Unit: 3677
